Kawo Water Alliance
Community water and sanitation since 2011

Budget narrative and detailed budget

Project	Solar-powered water points for Gidan Kowa, Tudun Rafi and Sabon Gari
Duration	18 months, from 1 March 2027
Amount requested	USD 131,663.50
Co-funding	USD 9,000.00 (communities and local council)

1 Budget summary

The budget covers the drilling and equipment of three boreholes with solar pumps, storage tanks and tap stands, together with the training needed for communities to manage them. Equipment and works account for almost half of the total cost, which reflects the depth of the aquifer in the area.

Unit costs are based on three quotations obtained in September 2026 and include delivery to site. Indirect costs are charged at 7% of the direct costs requested from the donor, in line with the call for proposals.

2 Detailed budget

Code	Budget line	Unit	Qty	Unit cost	Amount (USD)		
					Total	Requested	Co-funding
1 Personnel							
1.1	Project coordinator	month	18	1,200.00	21,600.00	21,600.00	0.00
1.2	Water engineer, part time	month	9	1,500.00	13,500.00	13,500.00	0.00
1.3	Community mobilisers (2)	month	36	350.00	12,600.00	10,800.00	1,800.00
Subtotal 1					**47,700.00**	**45,900.00**	**1,800.00**
2 Equipment and works							
2.1	Borehole drilling and casing	borehole	3	9,800.00	29,400.00	29,400.00	0.00
2.2	Solar pumping kit	kit	3	6,250.00	18,750.00	18,750.00	0.00
2.3	Storage tank, 20 m³	tank	3	3,100.00	9,300.00	6,300.00	3,000.00
2.4	Tap stands and piping	village	3	2,400.00	7,200.00	4,800.00	2,400.00
Subtotal 2					**64,650.00**	**59,250.00**	**5,400.00**

3 Training and community							
3.1	Water committee training	session	6	450.00	2,700.00	2,700.00	0.00
3.2	Hygiene promotion campaigns	village	3	1,100.00	3,300.00	3,300.00	0.00
3.3	Pump caretaker tool kits	kit	3	380.00	1,140.00	1,140.00	0.00
Subtotal 3					**7,140.00**	**7,140.00**	**0.00**
4 Monitoring and evaluation							
4.1	Water quality tests	test	24	65.00	1,560.00	1,560.00	0.00
4.2	Baseline and final survey	survey	2	2,800.00	5,600.00	5,600.00	0.00
4.3	Field vehicle running costs	month	18	300.00	5,400.00	3,600.00	1,800.00
Subtotal 4					**12,560.00**	**10,760.00**	**1,800.00**
Total direct costs					**132,050.00**	**123,050.00**	**9,000.00**
Indirect costs, 7% of requested direct costs					*8,613.50*	*8,613.50*	*0.00*
Grand total					**140,663.50**	**131,663.50**	**9,000.00**

3 Notes on selected budget lines

- Line 1.3: each community contributes a monthly allowance for one of the two mobilisers.
- Line 2.1: drilling depth is estimated at 85 metres; deeper boreholes would require a budget revision.
- Line 2.3: communities provide sand, gravel and labour for the tank platforms, valued at USD 1,000 per village.
- Line 4.3: the vehicle is owned by the Alliance, so only fuel and maintenance are charged.

4 Sustainability of running costs

After the project ends, each water committee will collect a small fee per jerrycan to pay the caretaker and replace worn parts. Solar pumps have no fuel costs, so the fee can stay below the price that households pay today to water vendors.

The Alliance will continue to visit each site twice a year for three years at its own cost.
