Quarterly Rainfall Bulletin, Station K-12

This bulletin summarises the rainfall measured at Station K-12 during the third quarter of 2025. The station is located on a hill farm about four kilometres north of Tarnby.

Total rainfall for the quarter was 214 millimetres, well above the long-term average[1]. September was the wettest month of the quarter.

Monthly rainfall at Station K-12

Month	Rainfall (mm)	Rain days
July	48	9
August	71	12
September	95	16

Notes for readers:

- Values are rounded to the nearest millimetre.
- A rain day is a day with at least 1 mm of rain.
- Data for 14 August were estimated from a nearby station.

The next bulletin will be published in January 2026.

[1] The long-term average for the third quarter is 162 millimetres, based on the years 1991 to 2020.
