Aurora 600 Air Purifier

Quiet, efficient air cleaning for living rooms and bedrooms

Cleaner air without the noise

The Aurora 600 removes dust, pollen and smoke particles from rooms of up to 45 square metres. Its three-stage filter captures 99.97% of particles larger than 0.3 microns.

A night mode lowers the fan to a whisper, so the unit can run while you sleep.

Key features

- Three-stage filter with washable pre-filter
- Air quality light that changes colour with the room
- Sleep timer from one to twelve hours
- Filter change reminder after 4,000 hours

Specifications

Coverage	Up to 45 m²
Airflow	420 m³/h
Noise level	24 dB at night mode

Aurora 600	up to 45 m²	24 dB	£189
Aurora 900	up to 70 m²	27 dB	£259

All prices include delivery within the United Kingdom.

Care and maintenance

1. Switch off the unit and unplug it before any cleaning.
2. Clean the filters as follows:
   (a) wash the pre-filter under lukewarm water once a month;
   (b) let it dry completely before refitting it;
3. Replace the main filter when the indicator turns red.

Never wash the main filter, because water destroys the filter fibres.

Warranty and service

Every Aurora purifier is covered by a three-year warranty from the date of purchase. The warranty covers faults in materials and workmanship but not damage caused by misuse.
