Autumn Planting Catalogue

Everything in this catalogue is suitable for planting between September and December. All seed is tested for germination each July and the result is printed on every packet.

Garlic

Solent Wight

A reliable softneck with large white bulbs that store until the following May. Plant each clove with its tip just below the surface.

Early Purple

A hardneck garlic with purple-streaked skins and a mild, sweet flavour. The bulbs are ready from late June.

Elephant Giant

Each bulb weighs up to 300 grams and the cloves are easy to peel.

Planting dates

Variety	Plant	Harvest
Solent Wight	Oct to Nov	July
Early Purple	Oct to Dec	June
Elephant Giant	Sep to Oct	August

Broad beans

Aquadulce Claudia

The classic autumn sowing, hardy to minus ten degrees. Pods of seven to nine beans appear in May.

Witkiem Manita

A compact variety about 60 cm tall that needs no staking.

Growing notes

- Sow 5 cm deep and 20 cm apart in a double row.
- Cover with fleece during hard frosts.
- Pinch out the growing tips when the first pods set to deter blackfly.

Onion sets

Radar

A Japanese variety that overwinters well and matures a month earlier than spring sets. It stores until March when dried properly.

Electric

Red-skinned, with sweet crisp rings for salads. Plant sets 10 cm apart with the tip showing.

Leeks

Musselburgh

A very hardy leek that stands in the ground until April. Sow in a seedbed and transplant in June.

Bleu de Solaize

Blue-green leaves turn violet in the cold, and the stems are thick and tender. It is best lifted after the first hard frost.

Winter lettuce

Winter Density

A small cos lettuce with a sweet, crisp heart. It will crop under cloches from November to March.

Arctic King

Hardy butterhead that survives temperatures well below freezing. Sow in a cold frame in the first half of October.

Rouge d'Hiver

A red-tinged romaine with an upright habit. It is happy in a window box as well as a bed.

Shallots

Jermor

Long copper-skinned bulbs with a delicate flavour. Plant in February or in autumn in free-draining soil.

Red Sun

A round red shallot that keeps its colour when cooked. Each set gives six to eight bulbs.

Spring cabbage

Durham Early

A pointed variety that can be cut as greens in March or left to heart. Sow in August and plant out in October.

Pixie

Small hearts of about 500 grams on plants only 30 cm apart. Suited to small gardens and large pots.

Garden helpers

Fleece and cloches

A one metre roll of horticultural fleece protects a bed of beans through a week of frost.

- Fleece roll, 1.5 m by 10 m, with 12 pegs.
- Glass cloche, set of two, with steel clips.
- Bulb planter with a stainless steel blade.
